

Palpool®

Transparency for all your logistic needs

Palpool is a web portal-based pallet management solution for closed loop systems based on RFID technology.

The core business is the pooling of high-quality, individualized plastic pallets.

Palpool is the ideal solution for implementing a modern and efficient pallet management system.

Three components (a handheld unit, a web portal and RFID-tagged plastic pallets) form the basis for a transparent, consistent accounting system. This enables the booking of all transactions and the control of stock to take place in real time.

Palpool®

Palpool benefits at a glance

- No minimum acceptance quantities of empty pallets
- The period during which you use the pallet is totally flexible
- Provision of cleaned and checked pallets, direct from the depot
- Cargo-carriers of the highest quality
- Advanced equipment e.g. UHF transponders
- Connection charges for data transmission are included in the price of the handheld unit
- Technical support for the handheld units
- Free use of the portal
- Details and evaluation relating to all Palpool activities at the touch of a button

Three components form the Palpool system:

The Palpool handheld unit

Through the use of handhelds units, pallet movements and all related data are recorded and stored – simply and accurately. This allows for a variety of evaluation options.

The Palpool Internet portal

The portal shows the data recorded by the handheld unit, processes it and prepares it for accounting purposes. Thanks to the unique ID number for each pallet, information concerning the number of units used and the usage periods within the pool is always at hand for the client to retrieve.

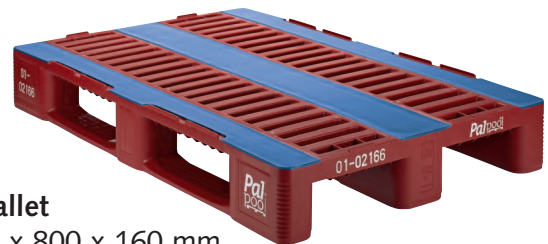

Pa.Nr.	Abgeber	Empfänger	Typ	Pa. Menge	Pa. Menge	Pa. Menge	Pa. Menge	Pa. Menge	Pa. Menge
01	Abgeber	Empfänger	01	1	1	1	1	1	1
02	Abgeber	Empfänger	02	1	1	1	1	1	1
03	Abgeber	Empfänger	03	1	1	1	1	1	1
04	Abgeber	Empfänger	04	1	1	1	1	1	1
05	Abgeber	Empfänger	05	1	1	1	1	1	1
06	Abgeber	Empfänger	06	1	1	1	1	1	1
07	Abgeber	Empfänger	07	1	1	1	1	1	1
08	Abgeber	Empfänger	08	1	1	1	1	1	1
09	Abgeber	Empfänger	09	1	1	1	1	1	1
10	Abgeber	Empfänger	10	1	1	1	1	1	1
11	Abgeber	Empfänger	11	1	1	1	1	1	1
12	Abgeber	Empfänger	12	1	1	1	1	1	1
13	Abgeber	Empfänger	13	1	1	1	1	1	1
14	Abgeber	Empfänger	14	1	1	1	1	1	1
15	Abgeber	Empfänger	15	1	1	1	1	1	1
16	Abgeber	Empfänger	16	1	1	1	1	1	1
17	Abgeber	Empfänger	17	1	1	1	1	1	1
18	Abgeber	Empfänger	18	1	1	1	1	1	1
19	Abgeber	Empfänger	19	1	1	1	1	1	1
20	Abgeber	Empfänger	20	1	1	1	1	1	1

The recording and management of plastic pallets takes place via the handheld unit and web portal only. Installation is not necessary and day-to-day handling is extremely straightforward.

The Palpool plastic pallets

Palpool pallets are

- extremely durable and resistant to deformation.
- ideally suited for automated conveying systems
- equipped with two integrated Gen2 UHF transponders with a reading range of up to two metres
- identifiable and traceable at all times via an individual ID number
- equipped to deal with the highest load safety requirements
- guaranteed to be available

Euro pallet

- 1200 x 800 x 160 mm
- closed runners

Half-pallet

- 800 x 604 x 160 mm
- highest runner strength
